

Introduction to HCI, 2015 Fall

HCI Final Implementation + Evaluation (and Redesign)

Due 12/13 23:59 (Team)

1. Finalize your project

- A. Finalize your project implementation
- B. Prepare for a convincing demonstration. If demonstration (e.g. due to complicated set up) is difficult, prepare a demo movie for your presentation.

2. Evaluation

- A. Carry out an evaluation for your application interface
- B. You are free to choose any methods learned in the class. **Justify or explain** why you chose the method you chose. Write a short report (included in the final report) of the process and results, and your own recommendation for "redesign" based on the evaluation results.

3. Project presentation should shortly reiterate:

- A. Synopsis of your project
- B. User/UI requirements and your design principle
- C. System architecture (preferably highlighting the MVC aspects)

and, newly include:

- D. Evaluation process, results and redesign idea.

What to submit (uploaded to the kulms):

- Final project report, video, presentation files and others in zip.
- In class presentation on Dec. 14~16.
